

*Your Community Health Foundation—Working for You*

**APPROVED RAPID RESPONSE EMERGENCY GRANTS**  
**Final Report of Emergency Grants Made Between April 1 & June 22, 2020**  
**\$630,425 Awarded for 53 Grants**

**FUNDING OVERVIEW**

As a community foundation, the [Partnership for Better Health](#) strives to serve as a catalyst, advocate and collaborator to establish health as a shared priority, toward ensuring that everyone has what they need for good health. In March of 2020, when the World Health Organization announced a global pandemic and the first cases of novel coronavirus began to multiply in Pennsylvania, the Partnership for Better Health's board dedicated funding for new Rapid Response Emergency Grants to local nonprofits. In making grants of up to \$25,000 available to local organizations, the Partnership understood the unprecedented health emergency facing our communities. Funding priorities for the new grants included the four pressing issues below.

1. **Emergency Response Services:** Grants are assisting nonprofit emergency responders with the purchase of essential health supplies, protective gear and equipment to keep them safe and highly effective as they address the COVID-19 crisis.
2. **Essential Health Services:** Grants are assisting health service organizations in responding to the emergency needs of vulnerable community members by ensuring the continuation of health services, including telehealth. Funds support primary care, mental health, substance use disorder and social-emotional services, and ensure clean, protected or virtual settings for the delivery of these services.
3. **Meeting Basic Human Needs (Emergency Shelter, Food & Rental Assistance):** Grants are supporting agencies in helping individuals who have been laid off, lost income and/or become newly unemployed as a result of COVID-19. For people who live paycheck to paycheck, lost wages can be devastating. Grants support access to nutritious food and related basic needs, as well as are helping housing providers and shelters respond to increased demand for emergency housing services and outreach. Funding also helps to ensure shelter providers are prepared to support social distancing practices and safe quarantine environments.
4. **Safe Summer Youth & Child Care:** Grants are assisting summer childcare programs in meeting the new CDC guidelines to operate safely during the pandemic. Funding supports the purchase of sanitation supplies, personal protective equipment and the additional staffing needed to allow for adequate supervision of smaller groups of children.
