The Partnership for Better Health champions and invests in ideas, initiatives, and collaborations to advance equity and improve the health of the people and communities in our region.

Established in 2001, from the sale of the former Carlisle Hospital.

Vision

The Partnership for Better Health will be a trusted catalyst, advocate, and steward to promote health equity and justice, ensuring everyone in our community has the opportunity to reach their highest potential for health.
Guiding Principles

- Equity
- Advocacy
- Collaboration
- Stewardship
- Innovation

2023 - 2026 Strategic Goals

I. Equitable & Inclusive Organizational Policies and Practices
II. Equitable & Inclusive Community Investment Processes
III. Center People with Lived Experience in Building Community Health Solutions
New Grantmaking Framework

IIa. Build an equitable and inclusive community investment process consisting of grants and initiatives.

General Guidelines

Deadlines are the same:
- March 1st
- August 1st
- December 1st

Can apply for more than one grant type per year but not two of the same type.
- We hope that by streamlining grants over $5,000 that some grantees will apply for one larger grant rather than multiple smaller grants.
The Foundation Does Not Fund:

- Endowment drives
- Annual fund drives or loans
- Advertising in yearbooks or programs
- Electoral activities
- Individual scholarships, internships or awards
- Retroactive expenses or projects
- “Athons” or other similar sponsorships
- Athletic or alumni activities
- Operating deficits
- Individual medical bills
- Capital expenditures in excess of $50,000 for program-related needs
- Any portion of fees to a national or state association
Grantmaking Priorities

We will fund organizations and projects that demonstrate a commitment to the following types of strategies:

- Addressing the social determinants of health.
- Advancing health equity by addressing systems and conditions that create inequities.
- Using effective and/or innovative strategies in creating positive health outcomes.
- Fostering collaboration focused on health justice.

Grantmaking Priorities (cont)

We will fund organizations and projects that demonstrate a commitment to the following types of strategies:

- Advancing systems change solutions (systemic strategies that are designed to improve all aspects of how a set of organizations, institutions or system work).
- Centering people with lived experience in the planning, leadership and implementation of the work—these are people with firsthand experience of the health challenges and inequities being addressed.
- Utilizing policy advocacy strategies that build the power of marginalized communities toward systems change.
Social Determinants of Health

Social Determinants of Health

- Education Access and Quality
- Health Care Access and Quality
- Economic Stability
- Neighborhood and Built Environment
- Social and Community Context

Health Equity

**Equality:** Everyone gets the same – regardless if it’s needed or right for them.

**Equity:** Everyone gets what they need – understanding the barriers, circumstances, and conditions.
Centering Lived Experience

- Creating space for people to share their experiences and expertise, and for that expertise to be valued and incorporated in decision-making.
- To center those with lived experience goes beyond focusing on a specific group as the beneficiary of an organization's mission.
- Centering lived experience is to elevate voices of those who are not always heard by including individuals of diverse backgrounds in strategy development and guiding of work, as well as representation within staff and board membership.
